Fastly CSOC Hiring Team
Fastly Singapore

Dear Fastly Hiring Team,

I am writing to express my strong enthusiasm for the Threat Detection Analyst position within Fastly's Customer Security Operations Center (CSOC) in Singapore. As a Master's candidate in Cybersecurity at New York University (graduating Dec 2026) holding AWS, Google Cloud, CompTIA CySA+, and Security+ certifications, I am excited to leverage my web application security background and technical expertise to defend Fastly's enterprise customers at scale.

My technical experience aligns directly with the CSOC's focus on application-layer threats and distributed system protection. Through hands-on coursework and security projects, I have developed a deep understanding of Layer 7 threat vectors—including Web Application Firewall (WAF) administration, Account Takeover (ATO), Bot attack mitigation, and web application servers such as NGINX and Apache. I am adept at utilizing Python and Linux shell scripting to automate log telemetry analysis, inspect payloads, and build custom security content. In addition, my cloud certifications across AWS and Google Cloud enable me to navigate hybrid and multi-cloud architectures while supporting customer agent integrations and troubleshooting software deployments.

Navigating APAC operations requires seamless communication across global teams. Completing my graduate studies at NYU underscores my professional fluency in English, while my JLPT N1 certification and prior internship experience in Japan provide the native-level linguistic and cultural competence needed to support Japanese-speaking enterprise clients. As a fast learner adaptable to 24x7 operational demands, I am fully prepared to commit to the Friday-to-Tuesday shift schedule and undertake international travel to US or global locations as required.

Thank you for your time and consideration. I welcome the opportunity to discuss how my web security foundation, multi-cloud certification stack, and cross-cultural communication skills can add immediate value to Fastly's Singapore CSOC team.

Sincerely,
Jettapol Tuetrakul
